KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the Fund and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk:</p>	<p>Refer to the “Risks” section (Para 9) of the Singapore Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risk in the Asian Region – The Fund’s investment is subject to general market risks, and their values may fluctuate due to various factors, such as changes in investor sentiment, political and economic conditions and issuer-specific factors. You are exposed to emerging market risk – Investing in securities in emerging markets may involve a greater risk than investing in more developed markets. You are exposed to China market risk – The value of the Fund’s assets may be affected by uncertainties such as political developments, changes in government policies, taxation, foreign exchange controls, currency repatriation restrictions, restrictions on foreign investment in China and other adverse liquidity, legal or regulatory events affecting the Chinese market. You are exposed to currency risk – Investments of the Fund may be denominated in various currencies. The net asset value of the Fund may be affected unfavourably by fluctuations in the exchange rates and by changes in exchange rate controls. The Fund is not denominated in Singapore dollars and you may be exposed to an additional exchange rate risk if your reference currency is Singapore dollars. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Fund is not listed in Singapore and you can redeem your shares only on Dealing Days as described in the Singapore Prospectus. You may not be able to redeem on a Dealing Day if a redemption limit is imposed or if redemption is suspended – There may be a 10 per cent limit on the number of shares that can be redeemed on any Dealing Day and the directors of the Company may temporarily suspend redemption during certain circumstances. You are exposed to the liquidity risk of the Fund’s investments – The Fund may not be able to sell assets in a timely manner and/or at a reasonable price. If this is the case, you may not be able to get your money 	

back when you want it.		
Product-Specific Risks		
<ul style="list-style-type: none"> • You are exposed to investment risk – Investment in shares of the Fund involves risk and <i>you may not get back the full amount you invested.</i> Past performance is no guarantee of future performance. • You are exposed to real estate fund risk and property securities risk – Although the Fund will not invest in real property directly, the Fund may be subject to risks similar to those associated with the direct ownership of real property (in addition to securities market risks) and accordingly, the value of these investments may fluctuate more than actual property. • You are exposed to industry or sector risk – The value of the Fund may be more volatile than a fund having a more diversified portfolio of investments covering different economic sectors. • You are exposed to single country / specific region risk – The value of the Fund may be more volatile than a fund having a more diversified portfolio of investments covering multiple countries. • You are exposed to single sector risk – The value of the Fund may be more volatile than a fund having a more diversified portfolio of investments. • You are exposed to concentration risk – The Fund invests in a relatively small number of companies and may be subject to greater risk of suffering proportionately higher loss should the shares in a particular company decline in value or otherwise be adversely affected than a fund that invests in a large number of companies. Although the Fund has regional investment universe, it may at times invest a large portion of its assets in certain geographical area(s) or countries. • You are exposed to small capitalisation/mid-capitalisation companies risk – Securities in small-capitalisation/mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general. • You are exposed to charges against capital risk – Fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth and on any redemption you may not receive back the full amount invested. • You are also exposed to RMB currency and conversion risk and risks associated with the Fund’s investment into other collective investment schemes.
