

# Stewart Investors Wholesale Worldwide Sustainability Fund

31 October 2020 Monthly Factsheet

For Adviser use only

## Investment Strategy

The fund will seek to invest in a diverse portfolio of equity securities which are listed, traded or dealt in on any of the regulated markets worldwide. The portfolio construction process does not take into account the constituents of the benchmark. The fund may have exposure to developed or emerging markets whilst maintaining its geographic diversity. The investment process will take account of sustainability themes and issues and requires positive engagement with companies in respect of these. The fund does not hedge currency risk.

## Investment Objective

To achieve long-term capital growth by investing in the shares of those companies which are particularly well positioned to benefit from, and contribute to, the sustainable development of the countries in which they operate. The Fund aims to exceed the MSCI All Country World Index over rolling five-year periods before fees and taxes.

Data as at: 31 October 2020

**Portfolio Beta** measures the portfolio's sensitivity to benchmark movements. Mathematically, it is the covariance of the portfolio vs the benchmark divided by the variance of the benchmark. The covariance and variance are ex ante calculations based on current weights and historic patterns of return over the past five years.

**Turnover** is the average of sales and purchases divided by the average portfolio size.

**Cashflow Adjusted Turnover** is the same as above, except that the lesser of sales and purchases is used in place of the average of the two. This is to adjust for turnover that is related to investing inflows or selling stocks to meet outflows rather than related to active management of the portfolio.
